

Junction Box	Pole Mount
PFA130-E	PFB130-E + PFA152-E
 <p>A technical line drawing showing a junction box (PFA130-E) mounted on a roof. The roof is represented by two lines meeting at a peak, with diagonal hatching on the left side. The junction box is positioned centrally below the peak, with its mounting bracket attached to the roof surface.</p>	 <p>A technical line drawing showing a pole mount assembly (PFB130-E + PFA152-E) attached to a vertical pole. The pole is a simple cylinder. The mount consists of a bracket with a circular opening, secured to the pole by a band with a locking mechanism.</p>
